

CHEZHAN L

SOFTWARE ENGINEER (FULL STACK DEVELOPER)

+91-96633-08432 | chethanl3079@gmail.com | [linkedin/chethanl](https://www.linkedin.com/in/chethanl) | Bengaluru, India

Full-Stack Developer with 7 years of expertise in building scalable enterprise solutions using Angular, Node.js, Java, and AWS cloud services. Proven track record of optimizing system performance, architecting microservices, and delivering innovative features that drive business growth. Passionate about implementing engineering best practices and solving complex technical challenges.

PROFESSIONAL EXPERIENCE (7 years)

Siemens Technology and Services Pvt. Ltd.

JULY 2021 – Present

Software Engineer

Product:

1. **COMPAS** (Electrical Products and Sales Domain) (current)
2. **DepoFinity** (Electric Charger Management and Dispatch Application)

Role/Responsibilities:

- Architected and delivered scalable solutions using **Angular, Node.js, Java**, and **PostgreSQL** in a **microservices architecture**, collaborating with product teams in **Agile environments**.
- Deployed and managed containerized applications on **AWS** using **Docker and Kubernetes**, ensuring availability and scalability.
- Built and optimized serverless workloads using **AWS Lambda (with layers)** and **Step Functions** within the **Serverless Framework**, integrating with **API Gateway, CodeBuild, S3, and CodeCommit** for seamless deployment and scalability.
- Implemented reliable messaging using **RabbitMQ** and **Apache Kafka** for lossless inter-service communication.
- Defined **KPIs** and integrated them into interactive dashboards for real-time monitoring and data-driven decisions.
- Developed comprehensive **test suites including unit (Angular: Karma/Jasmine; Node.js: Mocha/Chai), component, and API tests**.
- Drove **code quality** via reviews, improving design and engineering standards.
- Optimized performance by **refining database queries and code**, reduced average query time and improved load handling through **NFR testing**.
- Contributed to **architecture and design** for reliability, scalability, and performance across new and existing systems.
- Recognitions: **4x hackathon winner** for innovative product features.

Teamlease Services Pvt. Ltd.

APRIL 2019 – June 2021

Software Engineer

Client: Siemens Technology and Services Pvt. Ltd.

Product:

1. **DepoFinity** (Electric Charger Management and Dispatch Application)

Role/Responsibilities:

- Developed and maintained enterprise applications using **TypeScript, Angular, Java, Node.js, and PostgreSQL**.
- Designed and implemented scalable **RESTful APIs** enabling seamless data integration across client applications.
- Collaborated in **Agile** teams to prioritize and deliver high-impact features within sprint timelines while maintaining code quality and stakeholder alignment.

Software Engineer

Client: Siemens Technology and Services Pvt. Ltd.

Product:

1. **Circuit breaker** (Blockchain based web application)

Role/Responsibilities:

- Developed a **blockchain proof-of-concept** using **Ethereum, Solidity, and Node.js**, demonstrating feasibility for enterprise use.
- Built an **Angular** web app for real-time visualization of transactions and smart contract interactions.
- Configured a **Ganache** private blockchain for secure smart contract development and testing.
- Integrated **MongoDB** for off-chain data persistence.
- Implemented **wallet setup in Brave browser** for seamless contract deployment and transaction execution.

SKILLS

- **Languages:** JAVA, TypeScript, JavaScript, PostgreSQL
- **Frameworks and Libraries:** Angular, Node.js, Spring Boot, Serverless (AWS)
- **Database:** SQL, PostgreSQL
- **Cloud and DevOps:** AWS, Docker, Kubernetes
- **Message queues:** RabbitMQ, Apache Kafka
- **Tools:** Git, SwaggerAPI, Gitlab, Jira, Postman, Launch Darkly, Visual Studio code, IntelliJ IDEA

EDUCATION

Branch: Bachelor of Engineering (Electronics & Communication).

August 2013 - June 2017

College: Bapuji Institute of Engineering and Technology (BIET)

University: Visvesvaraya Technological University (VTU)

CERTIFICATIONS

- J spiders Course in Software development - April 2018
